📍 Tirunelveli , TamilNadu, India

## CAREER OBJECTIVE

---

Experienced Front-End Developer with expertise in building dynamic, user-centric web applications. Proven proficiency in designing, implementing, testing, and maintaining responsive front-end solutions within project timelines. Excellence in JavaScript, along with strong skills in technologies like ReactJS, Next.js,

## WORK EXPERIENCE

---

### BillPAY - Document Management System

- Designed and developed a dynamic UI to streamline data entry and client information management, reducing manual workload and improving efficiency.
- Utilized React.js, Next.js, Node.js, and Express.js with JavaScript and TypeScript for a seamless front-to-back-end experience.
- Built and optimized database solutions using SQL and MongoDB to ensure accurate and efficient data storage.

### BaaS360 - Business As A Service

- Developed a scalable Business-as-a-Service (BaaS) application designed to streamline office operations through a suite of integrated tools.
- Spearheaded front-end development using Next.js, implementing dynamic and user-friendly interfaces to enhance productivity and user experience.
- Built and optimized back-end functionalities with Node.js and ensured efficient data management using PostgreSQL.
- Played a critical role as a key front-end developer, contributing to the overall design and functionality of the application.

## EDUCATION

---

Bachelor of Technology.  
**Francis Xavier Engineering College,  
Tirunelveli**
